QUALITY PRINT SERVICES

NAZDAR 291 Series UV Cured Inkjet Ink for Fujifilm Acuity Printer Platform

- **Formulated as a direct replacement for Fujifilm Uvijet KI inks**
- **Colour matched to Uvijet KI inks**
- **Superior adhesion to resist edge chipping & peeling on flexible and rigid substrates**
- **Excellent print head & nozzle performance**
- **Consistent colour density**
- **Fast curing formula**
- **Long term exterior performance with proven resistance to the effects of UV degradation and fading**

With the industry's strongest third party warranty, you'll take comfort in knowing that Nazdar stands behind every drop of Nazdar ink that it supplies. Nazdar's warranty states that if Nazdar inks are ever proven responsible for a breakdown of a digital printer, Nazdar will provide reimbursement for the cost required to repair any damage to the ink train.

QPS Ltd proudly offer our Nazdar branded products as the most reliable and technically advanced in the industry.

Nazdar 291 series ink has been formulated as a direct replacement for the Fujifilm Uvijet KI series inks on the Fujifilm Acuity printer platforms.

Nazdar 291 ink demonstrates industry leading adhesion and can be used with both flexible and rigid substrates. Performance is particularly good with challenging materials such as fluted polypropylene and composite panels.

Outdoor performance matches that of the OEM offering, as with all Nazdar branded solutions. Allow us to demonstrate the saving available over the OEM product.

The ink can be installed quickly and easily. As a direct replacement the Nazdar pouch is simply fitted directly behind an UviJet pouch that has become empty. There is no requirement to flush the printer so one pouch can be changed at a time therefore preventing any ink waste during conversion to the Nazdar 291 series ink.

You will find the Nazdar brand buried in the history of nearly every inkjet printer manufacturer currently offering products to the market. Nazdar continues to enjoy the position as a preferred inks manufacturer to a number of OEM partners. As one of the most experienced ink development companies in the world, Nazdar offers more knowledge and R&D expertise than any other ink company.

Nazdar is known for products that push the envelope of colour and performance in the inkjet world. Nazdar continues to develop products that challenge the industry. Nazdar are aware of their customers requirements for products that outperform the colour capabilities of the OEM ink, bringing new life to your printer and to your output.
